

The WTA Platform.

Modern visibility to help you
plan, manage and optimise your
supply chain.

Logistics doesn't have to be a maze.

Leading Supply Chain Management

Our tool comes as standard for WTA customers and brings the management of all your freight into a modern, user-friendly interface. With a whole host of features which simplify processes and provide unbelievable insight.

Quickly find shipments and their status.

Manage orders, invoices and shipments.

A **single storage location** for all documentation.

Transform communication with stakeholders.

Analyse and optimise your supply chain.

ISO compliant CO2 emission **tracking**

Optimise Your Business

Say goodbye to spreadsheets. Save time, reduce manual operations and increase efficiency with our intuitive, easy to use digital platform.

No set-up required. Simply login to access your data. With a single, cloud-based online tool, you have access to all the information that you need related to your logistics.

Order Visibility

Simply better planning. Get real-time visibility into order milestones, ex-factory times, arrival times and more. Locate any information immediately with an advanced search function.

The search engine will scour your entire database to find a correlation with what you're typing. So, you can find shipments by looking for Shipment ID, Order ID, Container Number, Product Code, House Bill, Master Bill and more.

The screenshot displays a shipping tracking interface with the following components:

- Order Milestones:** A list of milestones with status indicators (green checkmarks for completed, grey circles for pending).
 - Ex Factory: 21-Jul-2021 12:37, On-time
 - Shipment Requested
 - Origing Receival at Wharf
 - Departure
 - Arrival
 - Clearance Commenced
 - Clearance Finalized
 - Unpacked
 - Estimated Pickup
- Map:** A map showing the shipping route from the United States to Colombia. A green box highlights the current status: **Actual Delivery to Destination Port: Friday, 06-Aug-2021**. A white box indicates **In Transit**. Another white box shows **Expected Delivery** with an ETA of 02-Apr-2020.
- Planned Itinerary:** A table detailing the shipping schedule.

Planned Itinerary	
Transport Mode	Carrier
Ocean	--
Port of Loading	Port of Discharge
Boston - USBOS	Buenaventura - COBUN
- Event Log:** A list of specific events with dates and times.
 - Pickup: Chandlers Puppy Parlor, 02-Aug-2021 14:38 UTC, +1 Day
 - Departure: Seattle - USSEA, 02-Aug-2021 14:38 UTC, on-time
 - Leg 1 of 1: SS Bananas, 02-Aug-2021 14:38 UTC, +2 Days
 - Port Arrival: Bogotá - COBOG, 02-Aug-2021 14:38 UTC, +2 Days
 - Delivery: Keljo Maria, 02-Aug-2021 14:38 UTC, on-time

Shipment Visibility Done Right

See everything you need to know about your live shipments, all in one place. Find departure and arrival times, manage notifications, documents, invoices, and more.

Use permission settings to limit staff access to sensitive information. Simple link generators allow you to share specific data points with buyers.

Easier Exceptions Management

Managing disruptions has never been simpler.

Raise efficiency with a centralised view of exceptions, paired with custom in-app notifications, reminders and automated email alerts. Budget better with AI-powered unexpected charge forecasting.

The screenshot displays a user interface for managing exceptions. It features a list of exception items, each with an icon (warning or clock) and a title. The first item is '1 Exception, 1 Reminder' with a warning icon, containing 'ETD Origin Port missed' and 'Reminder to return empty container'. The second item is '2 Exceptions' with a warning icon, containing 'Planned Origin Port ETD missed' and 'Customs hold'. To the right, a filter menu is open, showing 'Reminders' and 'Exceptions' sections, each with a 'New' badge and a list of checkboxes for filtering.

1 Exception, 1 Reminder

- ETD Origin Port missed**
Your shipment did not depart the origin port on the ETD of 15-Sep-2022
- Reminder to return empty container**
To avoid detention fees, return the empty container (ID) by {Return Empty By}.

2 Exceptions

- Planned Origin Port ETD missed**
Your shipment did not depart the origin port on the ETD of 15-Sep-2022
- Customs hold**
Your shipment is in an active {import or export} customs hold by {agency name(s)}. Please see [Lines Report](#) for more information.

Reminders New

- Reminder to pick up full container
- Reminder to return empty container

Exceptions New

- Planned Origin Port ETA Missed
- Planned ETA Missed
- Customs Hold
- Container On Hold
- Container not delivered on time
- Full container not removed on time
- Empty container not returned on time

Documents Centralised

No inbox scouring. No version control.

Upload, store, download and quickly access all documents related to any shipment from within the system. A single storage location, enabling transition to fully digital documentation processes and enjoy the environmental benefits that come with it.

Security measures ensure compliance with the UK's Electronic Trade Documents Act 2023.

The screenshot displays a user interface for document management. On the left is a sidebar with four menu items: 'Overview' (grid icon), 'Documents' (document icon, highlighted), 'Invoices' (dollar sign icon), and 'Activity' (line graph icon). The main content area is divided into two sections. The top section, titled 'Recent Documents', lists five files with download icons and timestamps: 'Invoice + packing slip.pdf', 'POD_XYZ.pdf', 'Proof of Delivery.pdf', 'TransportLabel_XXXX.pdf', and 'WaybillDoc_XYZ.pdf'. A 'View All Documents' link is located at the top right of this list. Below the list are two buttons: 'Download All Documents' and 'Upload'. The bottom section, titled 'Documents', is a table with two columns: 'Document Type' and 'Filename'.

Document Type	Filename
Commercial Invoice	Invoice + packing slip.pdf
Packing List	PackingList_XYZ.pdf
Purchase Order	Purchase Order.pdf

Analytics and Insights

Analyse and optimise your supply chain with new, easy-to-use reporting. Vital cost and time information is automatically logged, allowing you to make data-driven improvements to your logistics.

Providing complete control of your KPI and SLA reporting. Move away from best-guess decision making and take cost saving action based on your real supply chain data.

Advanced Inventory Management

With our in-platform warehousing management, you have enhanced visibility into your warehousing inventory.

Create outbound warehouse orders, track inbound receipts, view real-time inventory status, recent activity and historical data.

All information related to your storage, available in one place and managed within the platform.

ISO Compliant CO2 Emission Tracking

Monitor and improve the sustainability of your supply chain with our carbon emission tracking. Track progress on ESG in granular detail. Present this progress to customers as a competitive advantage.

Our system is audited and accredited by Smart Freight Centre, follows the GLEC Framework and compliant with ISO 14083.

How does it work?

Calculations are based on the shipment information in the tool (transport mode, weight, distance) and will cover all available legs within a shipment.

Serious about security

Our GDPR compliant system is subject to regular penetration and vulnerability testing, having achieved SOC2 Type 2 Certification in 2023.

Your data is protected via encryption during transmission and at-rest with industry standard protocols and methods. Meanwhile, established incident management and disaster recovery procedures are in place.

Hello, can I have an update on the status of my order? Cheers

Leave a question or comment about this specific shipment for everyone to see.

B ***I*** **U** Add message

Transform stakeholder communication

Communicate directly with our experts from within the tool using live chat. Read all vital shipment information on a single tab.

Pairing this with our notification settings and you'll never miss a development.

Learn more about The WTA Platform...

Dashboard Tab

A top-level summary of your supply chain. Offers easy navigation to more specialised areas of the tool. Prompts you if any shipments need your attention.

Bookings Tab

Book a shipment from within the portal or request a quote from WTA. See status updates on booking requests already submitted in the tool.

Shipments Tab

An overview of all your shipments and/or containers in a simple table view. Filter through them on any data point. View their live location on a world map.

Analytics Tab

Breathtaking supply chain data at your fingertips. Volumes, costs, weights, average transit times, CO2 tracking, popular routes and much more, all collected automatically.

Accounting Tab

All financial information related to your supply chain. Filter through invoices, calculate total due, deep dive into any accounting information.

Set-up FAQs

Does it work across every transport mode?

Yes.

Does it cost?

The WTA Platform comes as standard for everyone who uses WTA. All customers can access the tool once they have been setup.

How do I get started?

Speak to your dedicated account manager at WTA and they will complete the setup process.

How long does the setup process take?

Setup is an extremely simple process, which only requires email registration and verification from us. Easier than signing up for Facebook. From there, we can assist with staff training.

Who do I ask for assistance?

All our team at WTA are trained on The Platform. Your dedicated account manager should be able to handle any queries.

For more complicated enquiries, they will be able to seek assistance from our dedicated IT team to answer your question.

A winning combination

The **WTA Platform** is a vital step in our continued innovation. Bringing our expertise and exceptional customer service together with an industry-leading visibility tool.

With this combination, you have the tools for building an exceptional supply chain. One which works as a genuine competitive advantage and is perfectly suited to your business needs.
